

# SENIOR LIVING: The Art of Light

**CONVERSE  
WINKLER  
ARCHITECTURE**

"The bright open space of the Carriage Homes has been an effective marketing tool for Meadowood, attracting new residents to the community."

*Patty Morrell  
Director of Marketing  
Meadowood Corporation*

**Light:** It defines the environment around us. It delineates the space: the volume, shape, texture and color. It creates the mood and how we feel about the space.

Natural light is a critical factor in the design of senior living environments. It activates the part of our brain that maintains alertness. It orients us in time and place. It connects us to our surroundings.

At Converse Winkler we craft our interiors using *"the Art of Light"*.

Well placed dormers, vaulted ceilings, and modern open spaces are skillfully combined to allow the sun to enliven the environment and create a sense of place.

Creating Community, Enlivening Interiors,  
and Delighting Residents — It's what we do.
